

LUXURY MODULAR TOILETS

Unique in style. Environmentally friendly & water wise. Diverse lay-out options. Quality finish.

Our new product is the most flexibly designed bathroom concept. Luxury Modular Toilets provide a more permanent feel to your event set up, while maintaining a sophisticated finish. Another unique element is the no odour feature of this product. There is no need for ventilation of the room, as the air is evacuated after each flush. All toilets are porcelain with soft close lids and wall mounted. They do not require chemicals and the modules are floor level so no steps are required.
